

Vocal Music Catalog

Updated on Sept. 1, 2025

“I know of no other anthology that has captured such a wide slice of contemporary American composition. Having the first four volumes tailored to the abilities of high-school and early undergraduate singers demonstrates an unprecedented vision for the needs of young musicians as well as for the future of the genre. These volumes will prove a tremendous resource for teachers, students, and music historians, and they should have a prominent place in music libraries, both institutional and personal, throughout the country and indeed the world.”— **Tom Cipullo**

[Paul Ayers](#)
